## Cut & Polish #2™

Part	Size	Case Size
SEA-CP16	16 OZ	12
SEA-CP1	1 Gallon	4

### BENEFITS

- \* Removes light scratches and chalk residue
- \* Restores oxidized surfaces
- \* Removes heavy compound marks

### DESCRIPTIONS

This compound was designed to remove heavy oxidation, moderate scratches, and medium chalk residue from both painted and gel coat surfaces.

Follow with Sea-Shield® Swirl Remover #3 to restore gloss. Used by professionals looking to restore dull gel coat/paint. For very dry gel coat add Sea-Shield® Buffing Lube for better results.

### INSTRUCTIONS

Best results are achieved when using a circular polisher (1000-1500 RPM) equipped with a Sea-Shield® Cut & Polish Pad. Start machine using medium pressure while working in a 2 foot by 2 foot area. Move machine slowly back and forth.

Clean buffing pad and rebuf surface until most of the residue is gone. Wipe remaining residue off using a clean microfiber towel.

### RECOMEND SURFACE

- Paint
- Gel-coat
