# Final Polish<sup>™</sup>

Part	Size	Case Size
SEA-FP16	16 OZ	12
SEA-FP1	1 Gallon	4

## BENEFITS

- \* Removes light scratches
- \* Produces wet shine
- \* Brings back the clarity of the surface
- \* Easy-to-use formula

## DESCRIPTION

Sea-Shield<sup>®</sup> Nano Polish is a one-step product that restores paint, gel coat and acrylic. This product uses nanotechnology and microscopic particles to safely clean and polish paint to a perfect optical finish and a high-gloss shine. No need to fill in the scratches and swirls with thick waxes because there are none. For best results follow with Sea-Shield<sup>®</sup> Nano Polish should be followed with Sea-Shield<sup>®</sup> Nano Coating.

As a final step, apply Sea-Shield<sup>®</sup> Polymer Sealer for that final ultimate shine and protection.

## DIRECTIONS

Apply squeeze line of product onto the surface. Using a buffer on low speed, spread product throughout and increase speed to 1500 RPMs, work pad flat in a 2 foot by 2 foot area. This product works to restore gel coat, lightly corroded paint, and will bring back the clarity of acrylic windows.

## RECOMEND SURFACE

- Paint
- Plastic
- Gel-coat
